

## **BUG REPORT : 1**

**Bug Name:** The greatest bug of all time

**Bug ID:** (It will be automatically created by the BUG Tracking tool once you save this bug)

**Area Path:** <https://qainterview.pythonanywhere.com/> ( main index page)

**Build Number:** Version Number 1.0.1

**Severity:** HIGH

**Priority:** HIGH

**Assigned to:** Software Quality Assurance Team

**Reported By:** Md Mahfuz Hasan Shohag

**Reported On:** 14 December 2021

**Reason:** Defect

**Status:** New

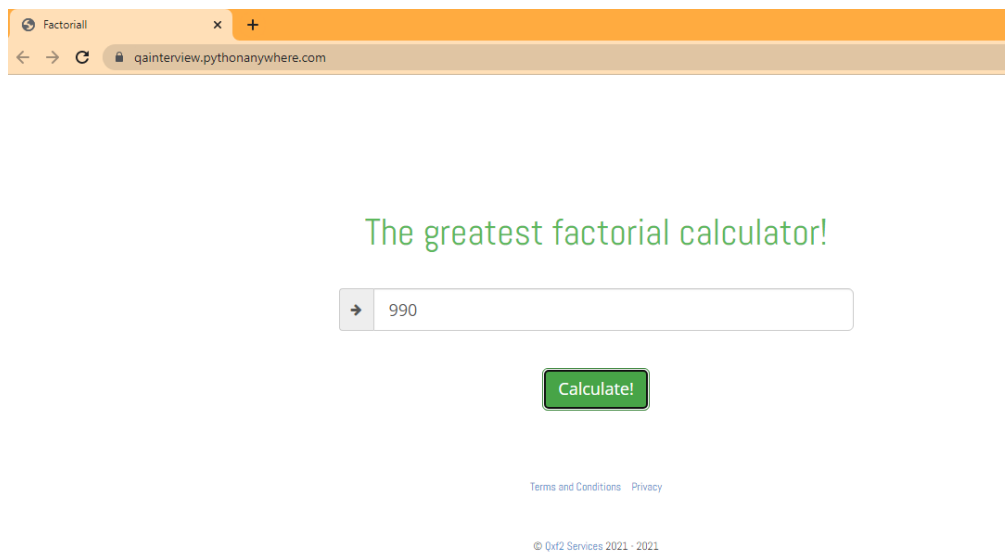

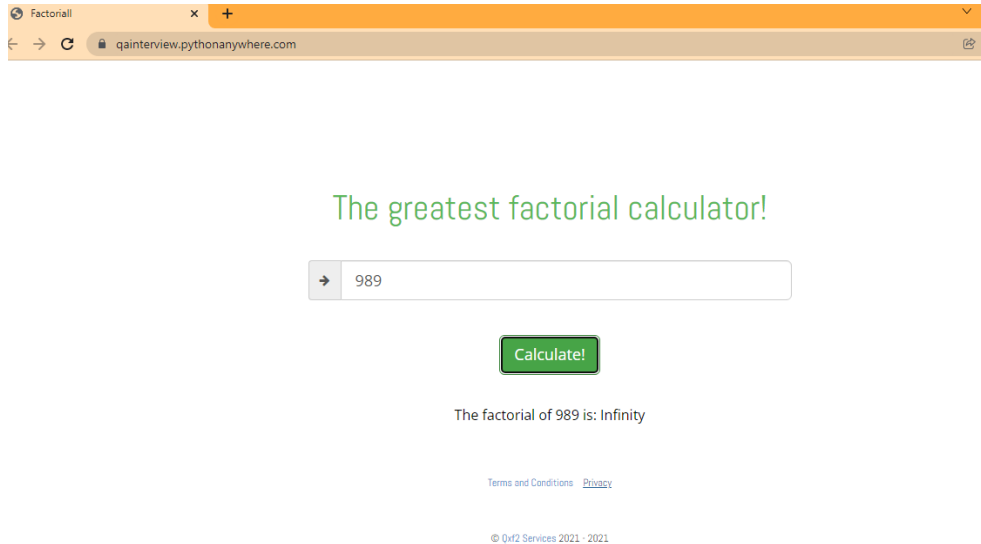

**Environment:** Microsoft Windows 10 Pro / Chrome

**Description:** The greatest factorial calculator application can not calculate greater than integer number 989

### **Steps to Reproduce:**

- 1) Opened any browser ( used Chrome for test case)
- 2) Navigate to the URL “ <https://qainterview.pythonanywhere.com/> “
- 3) Filled out the input field with positive integer numbers starting from 0 to 1000
- 4) Clicked on the “Calculate! ” button
- 5) Seen results upto integer number 989, but all the integers greater than 989 did not provide any result

**Expected Result / Notes:** The greatest factorial calculator application should be capable of calculating factorial of any integer number greater than 989

## **BUG REPORT : 2**

**Bug Name:** The Second greatest bug of all time

**Bug ID:** (It will be automatically created by the BUG Tracking tool once you save this bug)

**Area Path:** <https://qainterview.pythonanywhere.com/> ( main index page)

**Build Number:** Version Number 1.0.2

**Severity:** MEDIUM

**Priority:** MEDIUM

**Assigned to:** Software Quality Assurance Team

**Reported By:** Md Mahfuz Hasan Shohag

**Reported On:** 14 December 2021

**Reason:** Defect

**Status:** New

**Environment:** Microsoft Windows 10 Pro / Chrome

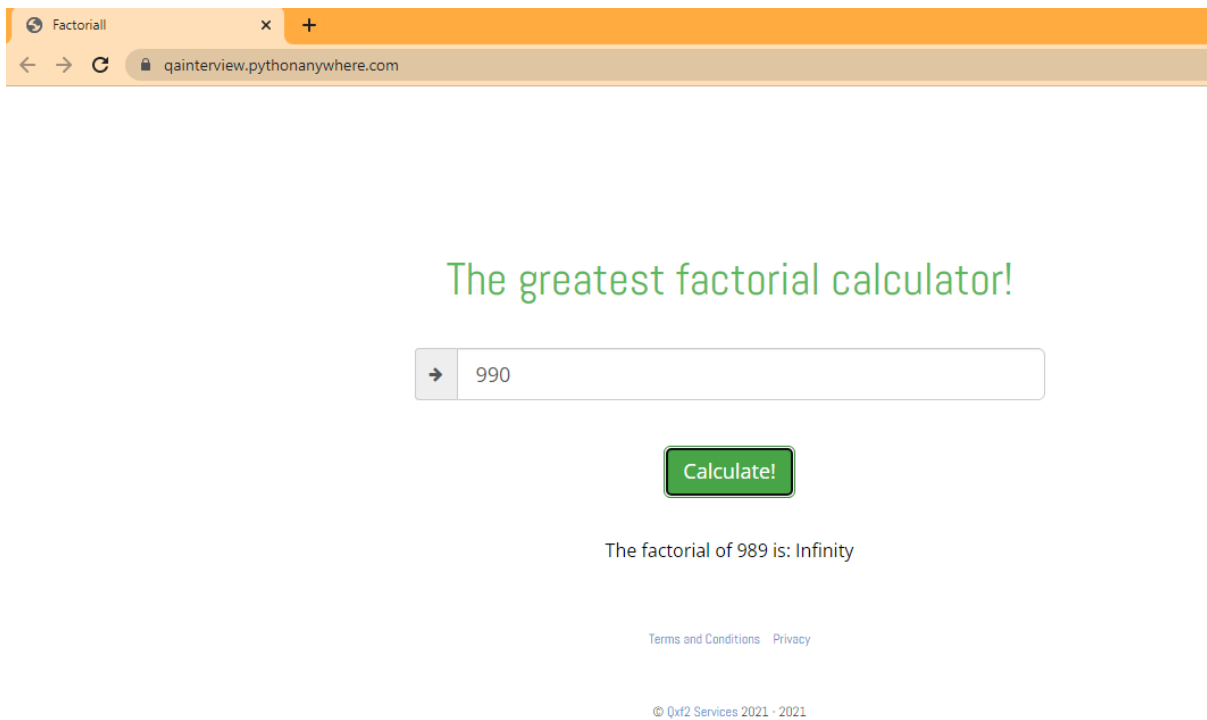

**Description:** The greatest factorial calculator application does not clear the result of previous input if the new input is greater than 989

### **Steps to Reproduce:**

- 1) Opened any browser ( used Chrome for test case)
- 2) Navigate to the URL “ <https://qainterview.pythonanywhere.com/> “
- 3) Filled out the input field with positive integer number 989
- 4) Clicked on the “Calculate! ”button
- 5) Again filled out the input fill with positive integer number 990 and clicked on the “Calculate! ” button several times

6) Seen the previous result and does not changes the result of any numbers of input more than 989

**Expected Result / Notes:** The greatest factorial calculator application should clear the result of previous input even though the number is more than 989

Factoriall x +
